## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 32, drawn to methods of detecting the presence of a disseminated cell marker, classified in class 435, subclass 4, for example.
  - II. Claims 16-30, drawn to methods of diagnosing metastatic cancer, classified in class 435, subclass 6, for example.
  - III. Claim 31, drawn to a method of detecting the presence of a tissue-specific marker in a sample not associated with the tissue-specific marker, classified in class 435, subclass 7.1, for example.
  - IV. Claims 33-36, drawn to kits comprising an affinity column and primers, classified in class 536, subclass 24.33, for example.
2. The inventions are distinct, each from the other because of the following reasons:

A) Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the inventions are directed to methods having different method steps, starting materials, and goals. Invention I is drawn to methods of detecting the presence of a disseminated cell marker, whereas Invention II is drawn to methods of diagnosing metastatic cancer, and Invention III is drawn to a method of detecting the presence of a tissue-specific marker in a sample not associated with the tissue-specific marker.

Art Unit: 1637

B) Inventions (I-III) and IV are separate and distinct as the kit of Invention IV is not used in the methods of Inventions I-III. As such, the Inventions would require search in separate and non-overlapping areas, imposing an undue search burden upon the examiner if not restricted.

3. Because these inventions are distinct for the reasons given above and have acquired a different status in the art as demonstrated by their different classification and recognized divergent subject matter and because inventions I-IV require different searches that are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
